Run box launchers

Pro/Enterprise only: lusrmgr.msc, gpedit.msc

Win + **R** then type the name · **Ctrl** + **Shift** + **Enter** runs it as admin

devmgmt.msc
Device Manager

services.msc
Services

eventvwr.msc
Event Viewer

compmgmt.msc
Computer Mgmt

diskmgmt.msc
Disk Management

taskschd.msc
Task Scheduler

lusrmgr.msc
Local users

gpedit.msc
Local policy

appwiz.cpl
Programs

ncpa.cpl
Network adapters

sysdm.cpl
System properties

msinfo32
System Information

resmon
Resource Monitor

perfmon
Performance Mon.

msconfig
Boot / startup

cleanmgr
Disk Cleanup

mstsc
Remote Desktop

control
Control Panel

winver
Windows version

regedit
Registry: Danger

Network

ipconfig /all IP, DNS, MAC, lease

ipconfig /release · **/renew** **CAUTION** new DHCP lease

ipconfig /flushdns clear DNS cache

ping -n 4 192.0.2.1 reachable?

tracert · **pathping** where it breaks

nslookup example.com DNS answer

netstat -ano ports + PID

net use Z: \\srv\share map a drive

System & repair

sfc /scannow **ADMIN** repair system files

DISM /Online /Cleanup-Image /RestoreHealth **ADMIN**

chkdsk C: /f **ADMIN** **CAUTION** fix disk errors

systeminfo OS, uptime, patches

whoami · **hostname** who and where

gpupdate /force reapply policy

gpresult /r policies applied

net user jdoe /domain locked? pwd expiry

Processes & power

tasklist running processes

taskkill /PID 4321 /F **CAUTION** force close

shutdown /r /t 0 **CAUTION** restart now

shutdown /a cancel shutdown

CAUTION **/F** and **/release** can lose unsaved work or drop a remote session. **chkdsk C: /f** runs at the next reboot. Tell the user first.

Danger zone

DANGER These erase or overwrite data. Double-check the drive letter or path and have a backup.

format D: wipes the volume

diskpart → clean deletes every partition

robocopy src dst /MIR deletes extra files at dst

del /s /q *.* deletes silently, no Recycle Bin

regedit one wrong key can stop boot

cmd /? shows help

| clip copies output

Tab completes paths

> log.txt saves it

REMEMBER

● Run **DISM** first, then **sfc /scannow** if files are corrupt

● **.msc** = console snap-in · **.cpl** = Control Panel item

● **169.254.x.x** after **/renew** = no DHCP server reply

● Use an admin prompt only for the task, then close it
