

Windows CMD & Run Commands

Use this when: you need a Windows tool fast: open a console with **Win + R** or fix a PC from the command line.

CompTIA A+ Core 2 (220-1202)
Sheet v1.0 · Sep 2026

Run box launchers

Pro/Enterprise only: `lusrmgr.msc`, `gpedit.msc`

Win + **R** then type the name · **Ctrl** + **Shift** + **Enter** runs it as admin

devmgmt.msc Device Manager	services.msc Services	eventvwr.msc Event Viewer	compmgmt.msc Computer Mgmt	diskmgmt.msc Disk Management
taskschd.msc Task Scheduler	lusrmgr.msc Local users	gpedit.msc Local policy	appwiz.cpl Programs	ncpa.cpl Network adapters
sysdm.cpl System properties	msinfo32 System Information	resmon Resource Monitor	perfmon Performance Mon.	msconfig Boot / startup
cleanmgr Disk Cleanup	mstsc Remote Desktop	control Control Panel	winver Windows version	regedit Registry: Danger

Network

ipconfig /all	IP, DNS, MAC, lease
ipconfig /release · /renew	new DHCP lease
ipconfig /flushdns	clear DNS cache
ping -n 4 192.0.2.1	reachable?
tracert · pathping	where it breaks
nslookup example.com	DNS answer
netstat -ano	ports + PID
net use Z: \\srv\share	map a drive

System & repair

sfc /scannow	repair system files
DISM /Online /Cleanup-Image /RestoreHealth	
chkdsk C: /f	fix disk errors
systeminfo	OS, uptime, patches
whoami · hostname	who and where
gpupdate /force	reapply policy
gpresult /r	policies applied
net user jdoe /domain	locked? pwd expiry

Processes & power

tasklist	running processes
taskkill /PID 4321 /F	force close
shutdown /r /t 0	restart now
shutdown /a	cancel shutdown

CAUTION **/F** and **/release** can lose unsaved work or drop a remote session. **chkdsk C: /f** runs at the next reboot. Tell the user first.

Danger zone

DANGER These erase or overwrite data. Double-check the drive letter or path and have a backup.

format D:	wipes the volume
diskpart → clean	deletes every partition
robocopy src dst /MIR	deletes extra files at dst
del /s /q *.*	deletes silently, no Recycle Bin
regedit	one wrong key can stop boot
cmd /? shows help	Tab completes paths
 clip copies output	> log.txt saves it

REMEMBER ● Run **DISM** first, then **sfc /scannow** if files are corrupt
● **.msc** = console snap-in · **.cpl** = Control Panel item

● **169.254.x.x** after **/renew** = no DHCP server reply
● Use an admin prompt only for the task, then close it
